TABLE OF CONTENTS.

The following synoptical table shows the first page of each of the principal sections of the successive MONTHLY WEATHER REVIEWS:

Title of section.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Summary.
Introduction	1	43	85	123	189	235	285	339	381	425	471	519	569
Storm Warnings and Weather Forecasts (H. H. C. Dunwoody and H. E. Williams	.....	.....	.....	.....	.....	.....	.....	.....	.....	425	471	519	.....
Climatology of the Month (Editor and A. J. Henry)	1	43	85	123	189	235	285	339	381	428	474	523	569
Climate and Crop Service (James Berry)	6	48	91	128	194	240	290	343	387	432	477	527	.....
River and Flood Service (Park Morrill)	8	50	93	129	196	242	291	345	389	434	479	529	574
Special Contributions	12	54	.....	134	199	245	294	348	392	437	483	532	.....
Notes by the Editor	16	55	98	161	205	249	302	351	398	445	490	540	.....
Meteorological Tables (A. J. Henry)	20	63	99	166	213	261	314	357	403	448	495	546	575

The following table shows the numbers of the Charts accompanying each of the successive MONTHLY WEATHER REVIEWS:

Title of chart.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Summary.
Tracks, high areas	I	I	I	I	I	I	I	I	I	I	I	I	.....
Tracks, low areas	II	II	II	II	II	II	II	II	II	II	II	II	.....
Precipitation	III	III	III	III	III	III	III	III	III	III	III	III	III
Isobars, surface isotherms, and resultant winds	IV	IV	IV	IV	IV	IV	IV	IV	IV	IV	IV	IV	I
Hydrographs	.....	.....	.....	VI	V	V	V	V	V	V	V	V	.....
Total snowfall	V	V	V	V	.....	.....	.....	.....	.....	VI	VI	VI	.....
Depth of snow	VI	VI	VI	.....	.....	.....	.....	.....	.....	.....	VII	VII	.....
Curves of probable maximum intensity of rainfall	VII	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....
Illustrating the mechanics of the kite	.....	VII	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....
Diagrams to accompany the mechanism of the kite	.....	.....	.....	.....	.....	.....	.....	VI	.....	.....	.....	.....	.....
Map of East Hill	.....	.....	.....	.....	.....	.....	.....	.....	VI	.....	.....	.....	.....
Cloudiness in path of total eclipse of May 28, 1900	.....	.....	.....	.....	.....	.....	.....	.....	VII	.....	.....	.....	.....
Record by kite meteorograph	.....	.....	.....	.....	.....	.....	.....	.....	VIII	.....	.....	.....	.....
Mount Tamalpais	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	VIII	.....	.....
Photo-thermo sunshine records	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	IX	.....	.....
Annual maximum and minimum temperatures	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	II
Sea-level temperature and pressure	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	IV
High-level pressure (10,000 feet)	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	V

CORRECTIONS AND ADDITIONS.

Page 4, line 9 from bottom, omit the entire line.
Page 5, column 2, table, Nashville, for "P." read "T."
Page 7, line 21, for "89° at Oakdale on the 7th" read "51° at Berthold Agency on the 9th."
Page 13, line 12, add "Division of Records and Meteorological Data."
Page 24, column 2, for Rison "5.62" read "7.62."
Page 28, col. 1, St. Ignace, for "—15, 18.4" read "—10, 19.8."
Page 29, column 3, Bernalillo, insert "0.28 and 3.0."
Page 30, column 3, Levering, omit "—27 and 21.4."
Page 31, column 1, Aurora, for "54.0" read "44.3."
Page 32, column 2, Forestbird, for "1.27" read "2.27;" Graham, for "60" read "69;" Stafford, for "49.0" read "49.4."
Page 46, column 1, line 19, "omit the whole line."
Page 47, column 2, Portland, Oreg., P., move "21 and —8" two columns to the left.
Page 68, column 2, Washington, insert rainfall "3.58."
Page 70, column 1, St. Ignace, for "13.7" read "19.8;" column 2, Cowgill, for "3.00 and 18.0" read "1.20 and blank;" Gordonville, for "4.92" read "4.72;" Hastain, for "7.88" read "6.83;" Houston, for "4.14" read "3.64."
Page 72, column 2, Carrollton, for "2.73" read "3.73;" column 3, Waverly, for "36.0" read "38.0."
Page 74, col. 1, Coleman Station, insert "minimum 25, mean 50.4."
Page 91, column 1, Portland, Oreg., P., transpose "—7" to the left; line 10 from bottom, for "56.0 and 5.3" read "60.2 and 9.5;" line 7 from bottom, for "9.72" and "4.91" read "9.76" and "4.95."
Page 102, column 2, Blanchard Springs, insert rainfall "10.72."
Page 104, column 2, Ames *b*, insert rain "0.29" and snow "0.8;" column 3, Winterset, for "1.89" read "1.91."
Page 105, column 2, Lewiston, for "4.19" read "4.49."
Page 106, column 1, Pontiac, insert "3.34" and "5.2;" St. Ignace, omit "—12" and "18.4;" Sandbeach, insert "2.40" and "5.0;" column 3, Radersburg, omit "75" and "—32" and "20.4."
Page 107, column 1, Nemaha, insert rainfall "1.62."
Page 108, column 2, Ashley, for "12.2" read "13.0;" Medora, for "1.68" read "1.00;" column 3, Wahpeton, insert rainfall "3.89;" Norwalk, for "3.45" read "3.44."
Page 109, column 2, Toledo, insert rainfall "15.77;" column 3, Ashcroft, insert rainfall "1.50."
Page 110, column 1, Gary, insert rainfall "1.64;" Oelrichs, insert "2.20 and "2.0;" column 2, Cuero, for "25" read "35."
Page 112, column 1, Saugeen for "30.01" read "30.06."
Page 115, omit "Winnemucca."
Page 135, line 11 from bottom, for "Bedford" read "Bradford."
Page 162, column 2, line 19 from bottom, for "S_0K_0" read "S_0K_1."
Page 163, column 2, line 18, for "William" read "Alexander Wilson."
Page 169, Sioux City, height of anemometer, for "109" read "164;" Lander, height of thermometer, for "26" read "28."
Page 172, column 3, Mooar, insert rainfall "3.83;" Washington, insert rainfall "5.13."
Page 173, column 2, Opelousas, for "68.0" read "69.6."
Page 174, col. 1, Mount Clemens, insert rainfall "1.63;" St. Ignace, insert "66," "19," "38.4;" Collegeville, for "2.02" read "1.25."
Page 175, column 3, Egg Island, omit "64" and "28" and "50.8."
Page 176, col. 2, Horse Cove, substitute "79," "31," "53.8," "10.52."
Page 177, column 1, Levering, omit "13" and "46.2."
Page 178, column 2, Camp Eagle Pass, for "52" read "50;" Cuero, for "45" read "41;" Fort McIntosh, for "95" read "96."
Page 179, column 1, Mayfield, insert rainfall "3.59."
Page 200, col. 1, line 4, for "South Carolina" read "West Virginia."
Page 209, line 34, for "one gallon" read "Imperial British gallon."
Page 211, line 37, for "interrupted" read "interpreted."
Page 213, column 2, line 17 from bottom, for "1863" read "1893."
Page 216, column 1, Parker, for rainfall "blank" read "Trace."
Page 219, column 3, Port Deposit, for 5.16" read "5.51."
Page 220, column 2, Bay St. Louis, for "0.19" read "0.29;" column 3, Nevada, for "65.1" read "65.2."
Page 221, column 1, St. Ignatius Mission, insert rainfall "0.26."
Page 224, column 2, Childress, for "66.9" read "67.0."
Page 225, column 2, Gratiot, insert rainfall "1.00."
Page 237, column 1, line 32, for "Topeka and Pueblo, Kans.," read "Topeka, Kans.," and "Pueblo, Colo."
Page 239, col. 2, line 8 from bottom, should read "16th and 27th, 7."
Page 240, column 2, Phœnix, Ariz., latitude, for "32°" read "33°;" latitude, Los Angeles, for "06′" read "03′;" Wilmington, for "P." read "T." and transpose the figures "74" and "+12" to the right; Atlantic City, for "T." read "P."
Page 254, column 1, line 11 from bottom, for Table "3" read "2."
Page 255, column 1, line 9, for "20" feet read "40" feet.
Page 256, last column of Table 7, for "20" feet read "40" feet.
Page 257, line 4 from bottom, for "Sunday" read "Monday."
Page 258, column 1, line 32, for "2:11" read "1:59:12."
Page 260, line 16, for "the velocity" read "the wind velocity."
Page 264, column 3, Oleta, for "64.9" read "65.5."
Page 266, column 3, Rockwell City, add rainfall "0.92."
Page 267, column 1, Hays, for "98" and "45" and "68.6", read "100" and "48" and "74.8."
Page 270, column 3, Logan, for "1.41" read "1.51;" Milfordton, for "62.7" read "64.5."
Page 271, column 1, North Royalton, for "55.4" read "65.4."
Page 272, column 2, Bremone, for "85.3" read "82.0;" Camp Eagle Pass, for "68" read "65;" Fort McIntosh, for "65" read "63;" column 3, Doswell, insert rainfall "2.38."
Page 289, col. 2, Spokane, transpose "78" and "+23" to the right.
Page 296, column 1, middle, for "1887" read "1897."
Page 301, equation 6, add "infinity" as the upper limit after the sign of integration.
Page 302, column 1, line 1, insert "r" in the second term within the brackets.
Page 320, column 1, Griggsville, insert rainfall "4.50."
Page 321, column 1, Hays, insert "106" and "57" and "79.0."
Page 322, column 1, Stanton, for "72.8" read "73.8;" Mapleplain, omit "56" and "74.3."
Page 323, column 2, Elko, for "0.00" read "0.21;" Elko (near), for "blank" read "0.21."
Page 326, column 2, Henrietta, for the last three columns substitute "59" and "86.4," and "1.51."
Page 342, column 2, line 36, for "8th to the 16th" read "7th to the 15th;" line 37, for "74 reports" read "77."
Page 343, column 2, for "P." read "T.," and transpose the figures "89" and "+24" to the right.
Page 356, column 1, Pueblo, for "2,168" read "7,112."
Page 362, column 3, Wilton Junction, insert rainfall "2.58."
Page 364, column 1, Mapleplain, omit "43" and "67.1."
Page 366, column 2, Saxon, for "94" read "98;" column 3, Fayetteville, for "68.9" and "3.92" read "71.2" and "2.92."
Page 367, column 3, Warren, insert rainfall "4.09."
Page 387, column 2, Spokane, for "P." read "T."
Page 392, col. 2, line 34 from bottom, for "Lawson" read "Lamson."
Page 399, column 1, line 16 from bottom, for "7 inches deep" read "7 deep."
Page 403, column 2, Saltillo wind, for "W." read "N."
Page 407, column 1, Ukiah, insert rainfall "0.10;" column 2, Huntington, for "99" and "76.4" read "89" and "76.2."
Page 410, column 3, Fort Missoula, for "55.2" read "55.4."
Page 411, column 2, Wells, insert rainfall "0.00."
Page 413, column 1, for "Pondcreek" read "Jefferson."
Page 414, column 1, Erasmus, insert "90" and "30" and "65.0."
Page 415, column 2, Waukesha, for "67.0" read "67.2."
Page 449, column 2, last line, should read "Chart VI, Total snowfall during the month," and the same correction is to be made on the chart itself.
Page 452, column 1, for "Benson" read "Casa Grande;" Flagstaff, insert rainfall "0.14;" Fort Defiance, for "1.43" and "2.0" read "1.53" and "3.0;" column 2, Bodie, for "2.31" read "1.56;" Bowmans Dam, for "4.74" read "4.04;" column 3, Edmanton, for "4.38" read "3.78;" Fordyce Dam, for "5.55" read "4.95;" Laporte, for "6.79" read "4.84."
Page 453, col. 1, Summerdale, for "5.22" read "5.02;" Susanville, for "2.65" read "2.45;" col. 2, Pagoda, for "44.4" read "44.5."
Page 454, column 3, Portsmouth, for "2.01" read "1.41."
Page 455, column 1, Norton, insert "91" and "28" and "55.9;" column 2, Melville, insert rainfall "3.78;" column 3, Berlin, for "2.17" read "1.87."
Page 456, column 3, Dupuyer, omit "0.60" and "6.0"
Page 457, column 1, Creighton, for "2.17" read "2.10;" Kirkwood, insert rainfall "4.68;" column 2, Springview, insert rainfall "2.75."
Page 460, column 2, Dallas, for "67.7" read "67.6;" Fort Clark, for "48" read "45."
Page 462, column 1, Hamilton, for "20.04" read "30.04."
Page 484, column 1, Torreon, for "8,720" read "3,720."
Page 487, line 7, for "Figure 2" read "Figure 1."
Page 498, column 2, Hot Springs, insert rainfall "5.29."
Page 499, column 2, Macclenny, insert rainfall "1.97."
Page 500, column 2, Whitten, insert rainfall "0.53;" column 3, Spencer, insert "0.12" and "4.0;" Spirit Lake, insert "0.20" and "2.0."
Page 505, column 1, Bandon, for "46.6" read "48.6."
Page 506, column 1, Rochford, insert "—11" and "29.8;" Camp Eagle Pass, for "94" read "96;" col. 2, Fort Clark, for "4" read "34."
Page 507, column 2, Laramie, insert rainfall "0.33."

INDEX.

Abbe, Prof. Cleveland. (Notes by the Editor.)
Early history of the thermometer and barometer 16
Reprint of early meteorological charts 16
Meteorology in the public schools 17
Liquid air (Linde's apparatus) 18
Value of meter and yard 19
International cloud observations at Toronto 19
Suggestions to observers 55, 99
Fall of an aerolite in Arizona 56
Cycles in meteorology 57
Development of the kite by European scientists 58
Musschenbroek's theory of the kite 59
Dr. Thomas Young on the kite 59
Brandes on the kite 59
Cavallo's experiments with kites 60
Chemical composition of the upper air 61
Opening of navigation in Canada 63
Ice in Kennebec River 98
Fire at Huron, S. Dak 98
Stereoscopic study of clouds 98
Long-continued meteorological records 98
Monument to Buys-Ballot 99
Seasonal forecasts for Oregon, by B. S. Pague 161
Cloud heights—a problem for students 161
Franklin Kite Club 162
The kite as used by Espy 163
Kite used in 1822 by Fisher 163
Archibald on kites 164
Efficiency of windmills (extract from Douglas Archibald) 164
Franklin Kite Club and James Swaim 165
Kites in America and Europe 165
Weather telegraphy in England and America 205
Captain Dansey's kite for stranded vessels 206
Kerkam's kite with rocket signals 206
Use of the search light in meteorology 206
Waterspouts off Long Island 207
Waterspout, cloudburst, or tornado 207
Character of the skylight 207
Atmospheric vapor 208
Meteorological use of the term "Local" 208
Water measurements for irrigation 208, 545
Melting snow and river floods 209
Snowfall in Colorado 210
Evaporation at Fort Collins, Colo 210
Hail and a rain gauge for its measurement 210
Ignis fatuus or Jack-o'-Lantern 211
Current weather and future crops 211
Secular changes in climates and crops 211
Peculiar mountain storms (note by J. H. Struble) 212
Cirrus clouds on the northwest side of a storm 212
Anchor ice 212
Chinook and the signs of its approach, by A. B. Coe 213
Frost formations 213
Records of foggy and cloudy days 249
Homogeneity and uniformity 249
Electrical districts 249
Tornado frequency per unit area 250
Thunderstorms at Eustis, Lake Co., Fla 251
Mechanism of thunderstorms 251
Frequency of thunderstorms 251
Audibility of thunder 252
Movements of winds and clouds in Minnesota 252
Hourly results from self-registers at W. B. Stations 252
Recent earthquakes 257, 310, 399, 448, 493, 542
Seismographs at meteorological stations 259
Climate and crime 259
Hot winds in Missouri 260
Hot winds in Kansas 260
Bright meteor 261
Death of Mr. Joseph Cottier 303
Deaths of Weather Bureau observers 303
Retirement of Professor Hann 303
Cloud heights at Toronto 303
Rain gushes in thunderstorms 303
Importance of sound theories 304

Thermometer exposure 306
Fake storms 307
Practical utilization of lightning 307
Mountain storms, by A. D. Elmer 307
Landslide in Vermont 307
Origin of the St. Louis tornado, by M. C. Walsh 308
Frost formations 308
Earthquake-proof buildings 309
Thunderstorms in Franklinville, N. Y. (J. W. Kales) 309
Kites at the Chicago conference, August, 1893 310
Origin of descending gusts of wind. (C. A. Love) 351, 447
Postal telegraph clock and weather bulletin 351
Electric waves in the atmosphere 352
Electrical districts 352
Lightning and magnetic rocks. (Abstract from F. Pockels.) 352
Structure of hailstones. (Description by F. Rinne.) 352
Ancient climate of Arizona 353
Vitality of seeds 353
Mauritius—meteorology and crops 354
Practical science in Germany. (F. H. Mason) 354
Climatological data for Jamaica, W. I 259, 356
Cyclone in Nicaragua 356
Seismic noises 393
Old weather records 398
Depth of hail fall 399
High level stations in Jamaica 399
Forms of lightning 400
Resultant and prevailing winds 400
Frost formation in St. Paul. (Report by H. Volker) 401
Handbooks of the Deutsche Seewarte 401
On verifying the Laplacian barometric formula 443
Circular by the Chief of the Weather Bureau 445
Mountain stations in North Carolina 445
Hydrodynamic equations for the atmosphere. (C. Chree.) 445
Rain drops: their size and rate of fall 445
Atmospheric electricity—Brillouin's theory 446
Hurricanes in the West Indies, by J. Ridgway, Jr 447
Altitudes of clouds (with letter from B. C. Hawkins) 447
Distant cloud banks 448, 543
The kite in France. (Abstract from Teisserenc de Bort) 490
Local climatic changes 491
Celebration of the semicentennial of the Royal Prussian Meteorological Institute 491
Meteorological station in Terra del Fuego. (M. Y. Ransom) 493
Weather Bureau station on Mount Tamalpais 493
Mechanical determination of resultant wind. (Besson's apparatus) 540
Meteorological stations of Harvard University 540
Meteorology in the United States Geological Survey 541
Electric storms at Sacramento 542
Distant cloud banks 543
The tension of aqueous vapor 543
Cloudy condensation 543
Cycles in meteorology 544
Chinooks in Iowa 545
General climatic conditions for 1897 569
Aitken, John, views on condensation of vapor 543
Tension of aqueous vapor 544
Anderson, Dr. W. W., earthquake at Statesburg, S. C 258
Arago, Dominique François Jean, classification of lightning 400
Archibald, Douglas, on kites 164
Efficiency of windmills 164
Assmann, Dr. Richard, celebration of the semicentennial of the Royal Prussian Meteorological Institute 492

Banks, Dr. Albert A., lightning strokes 352
Bárcena, Dr. Mariano, contributes Mexican data 1, 17, 43, 61, 85, 98, 123, 189, 212, 235, 259, 285, 308, 339, 356, 381, 403, 425, 471, 483, 519, 538
Bates, W. S., kite used by Sir George Nares (abstract) 312
Barwick, James A., electric storms of California 539
Behrman, Captain, log kept by 485
Berry, James, climate and crop service. (*See* Table of Contents.)
Besançon, balloon ascension by 443

Harrington, Prof. Mark Walrod, exploration of the upper air. 313
Hatch, E. J., maps showing landslide 307
Hazen, Prof. Henry Allen, areas of high and low pressure 1, 43, 85, 123, 189, 236, 286, 339, 382, 427, 473, 522
Forests and rainfall 395
Bright meteor 484
Hawkins, Barry C., seismic noises in North Carolina and Georgia 393
Area of heavy rainfall in the southern Appalachians 442
Proposed station on Satulah Mountain, N. C. 445
Measurement of cloud altitudes in mountainous regions .. 447
Hellmann, Gustav, history of the thermometer and barometer 16
Reprint of early charts by 16
Rain observations by 249
Henry, Alfred J., contributes the meteorological tables and climatology of the month. (*See* Table of Contents.)
Explanation of meteorological tables 20, 166, 314, 357, 448, 546
Notes explanatory of the charts 21, 166, 315, 357, 449, 547
Local storms 86, 190, 236, 286, 383
Excessive precipitation in the United States 13
Climate of Alaska 248
Tables prepared by 252
Henry, Joseph, humidity of the atmosphere during rain 544
Hepworth, Lt. M. W. Campbell-, aurora australis of April 204
Hermite and Besançon, balloon ascension by 443
Herring, A. M., dynamic flight (abstract) 248
Holt, William I., ice and snow on Kennebec River 98

Jennings, Thorp B., hailstorm at Topeka, Kans 237
Johnstone, Robert, contributes data 444, 483
Jordan, Thomas B., sunshine recorder heliograph 485, 486

Kales, John W., thunderstorms in Franklinville, N. Y 309
Explosive noises at Franklinville, N. Y 393
Kerkam, Robert E., kites with rocket signals 206
Kimball, Capt. S. I., communicates data 425, 471, 519
Koettgen, Else, optical measurements by 207

Lamprecht, Guido, abstract from, on periodicities 57
Linde, Dr. Karl, experiments on condensation of gases 18
Ling, Charles W., greatest daily range of temperature at Havre, Mont 523
Love, Charles A., formation of hail 351, 447
Lovell, Surgeon General Joseph, ordered surgeons at military posts to keep records of the weather 491
Lyons, Curtis J., contributes data 1, 43, 85, 112, 123, 180, 189, 226, 235, 285, 339, 370, 381, 416, 425, 462, 471, 519

McAdie, Alexander G., whirling alto-stratus 245
Problem of the kite 246
Climate as a controlling factor in long distance transmission of electrical energy 439
McClure, Prof. S. E., death of 303
Mallet, earthquake studies by 309
Manissadjian, J. J., observations at Merzivan, Turkey 245
Margary, H. W. O., record of thunderstorms at Eustis, Fla 251
Maring, Delos T., improved sunshine recorder 485
Marvin, Prof. Charles Frederick, mechanics and equilibrium of kites 136
Table for conversion of indicated wind velocities into true velocities 256
Mascart, names of halo phenomena 305
Mason, Frank H., Physical-Technical Institute at Charlottenburg, Berlin 354
